Since 1984, Enea have been designing and manufacturing exceptional furnishings for commercial and domestic spaces in the Basque Country, Spain. We are deeply proud of our roots in local, collectivist industrial engineering. Through collaborative relationships with designers and clients, we produce pragmatic, progressive furniture as beautiful as it is durable. Combining knowledge and experience with innovation and experimentation, at Enea we pursue excellence, creating lasting furniture which uphold the upmost quality, design sustainability and versatility. Our goal as a cooperative is to bring the best of local manufacturing to the global market.

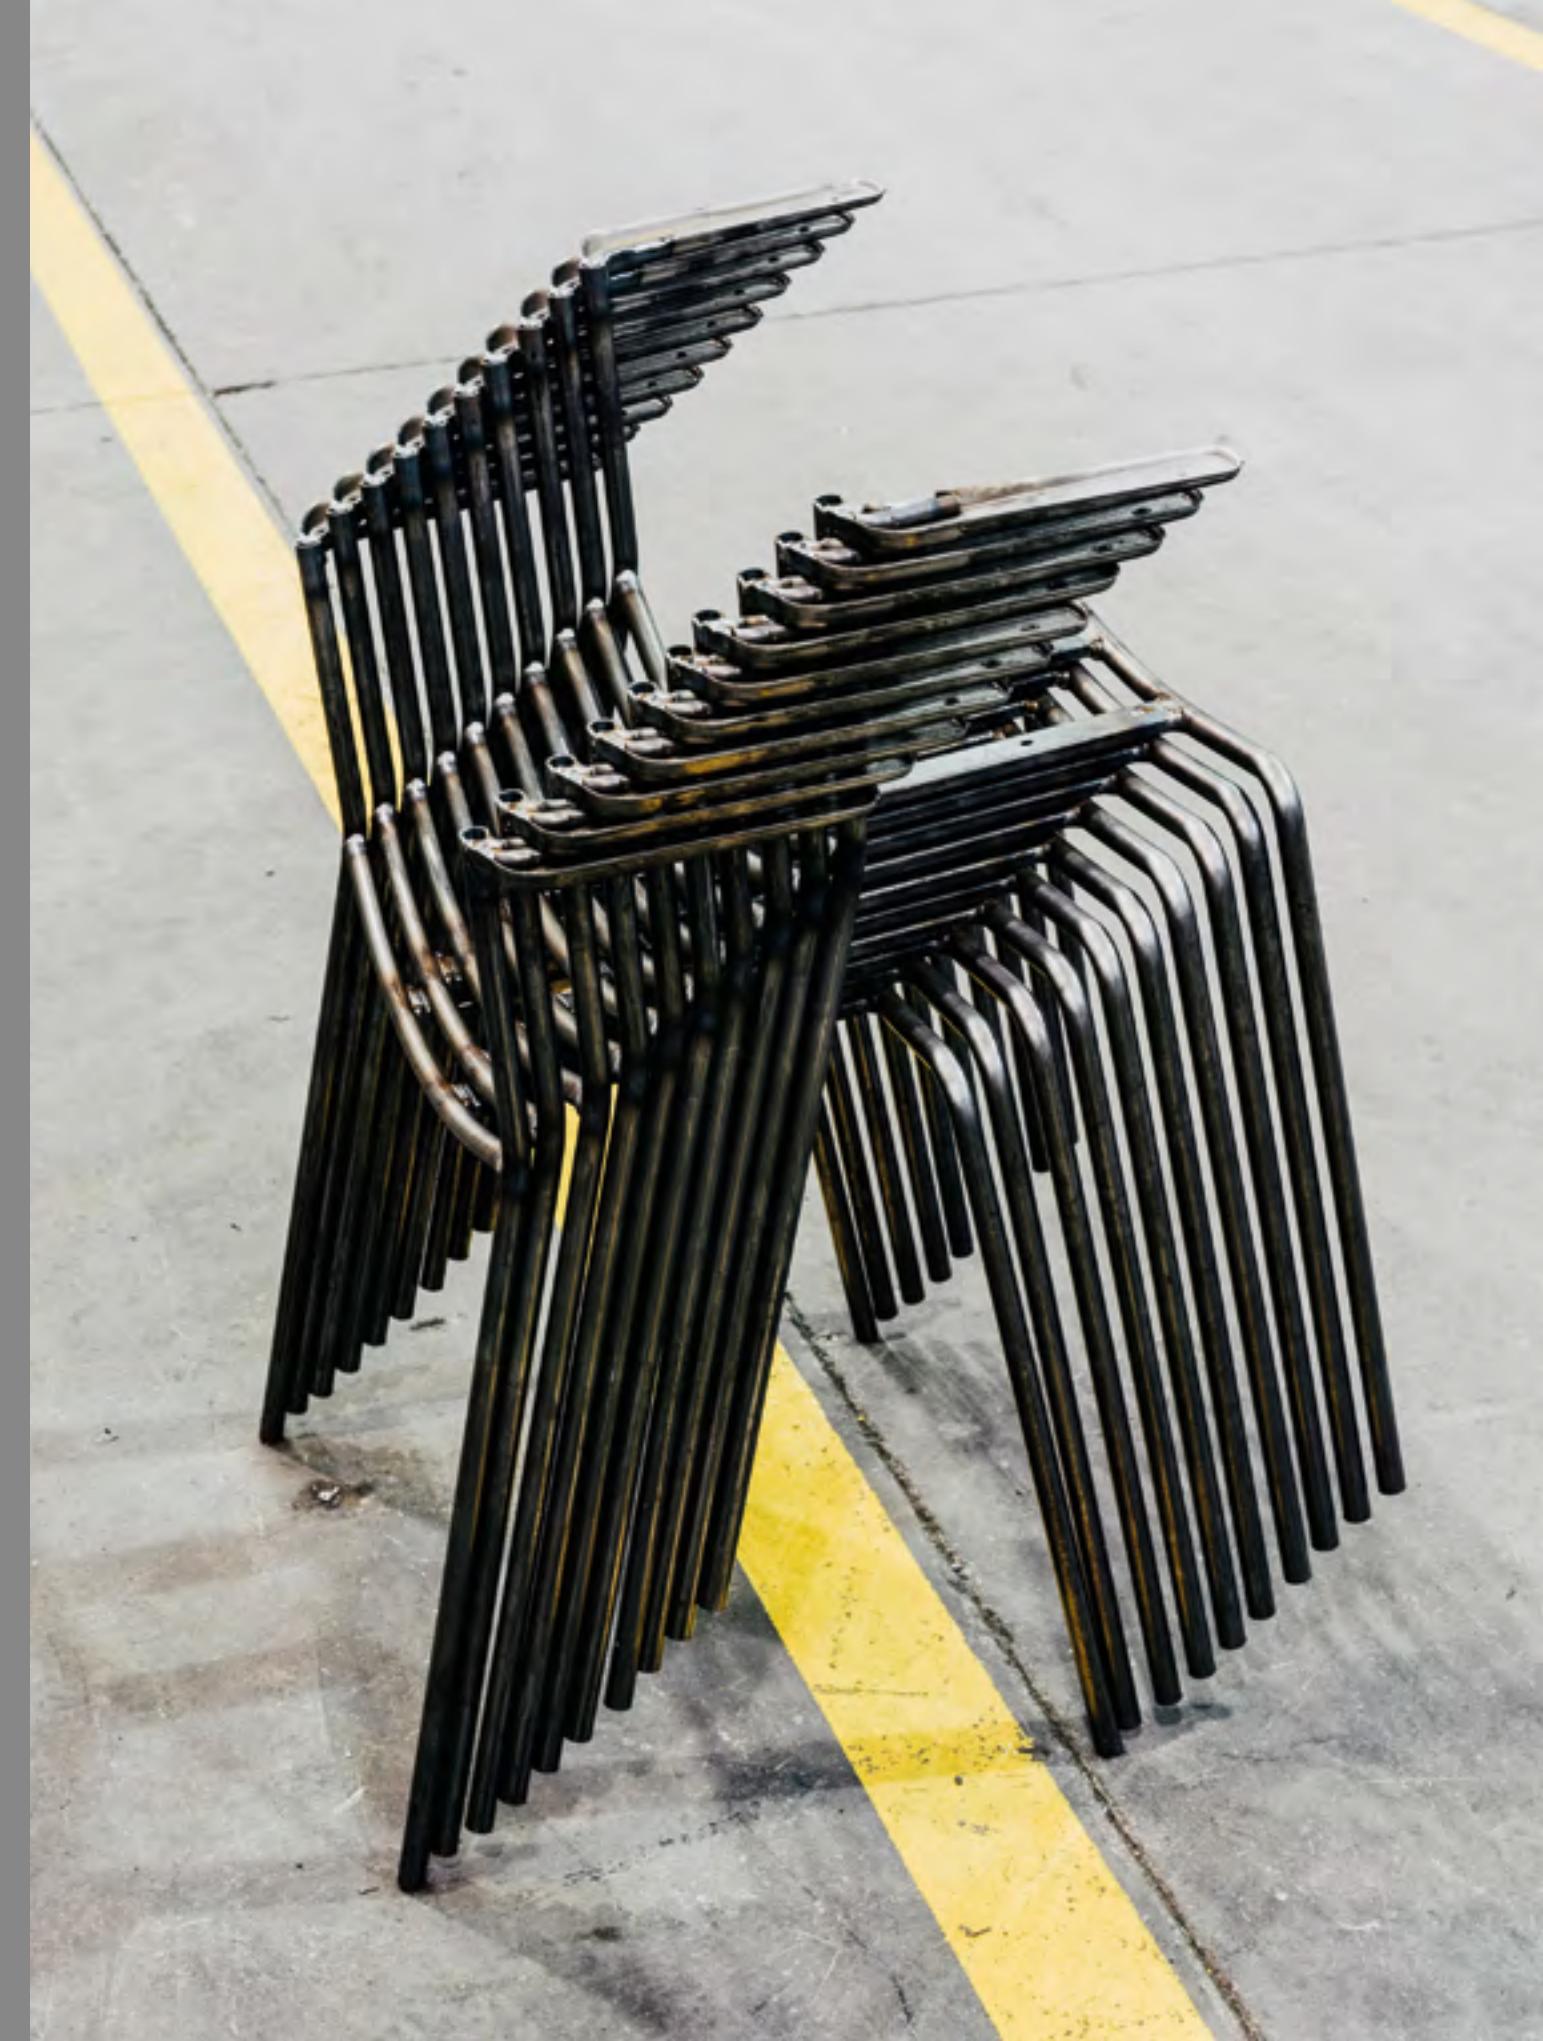

Desde 1984, diseñamos y fabricamos en el País Vasco, España, un mobiliario de alta gama para espacios públicos y domésticos. En nuestro ADN se encuentran la tradición cooperativista y la innovación en el campo de la ingeniería industrial. A través de la colaboración con diseñadores y clientes, fabricamos muebles pragmáticos y modernos a la vez que sólidos y bellos. Con la excelencia como objetivo, en Enea combinamos conocimiento y experiencia con innovación y experimentación para ofrecer un producto atemporal, sostenible, de la máxima calidad y versatilidad. Nuestro propósito como cooperativa es trasladar lo mejor de la producción local al mercado global.

Years of experience and research into innovative industrial techniques allow us to be inventive in our designs. The result is a striking, contemporary aesthetic. Bespoke finishes and inbuilt versatility mean pieces can be fine-tuned according to client needs, with bold, customised colour and texture options available.

Closed-loop production enables us to ensure the integrity of every piece we produce. We believe that furnishings of extraordinary design quality should also have permanence integrated into their engineering.

Años de experiencia e investigación en innovadoras técnicas industriales nos permiten ser creativos en nuestros diseños. El resultado es una estética contemporánea con una marcada personalidad. Los acabados a medida y la versatilidad intrínseca de los productos se adaptan a las necesidades del cliente, con colores y texturas personalizadas.

Asumimos todas las fases de producción, lo que nos permite ofrecer total garantía en cada uno de nuestros productos. Creemos que el mobiliario de alta calidad y diseño no está reñido con una industria basada en la ingeniería.

Start-to-finish
manufacturing
guarantees quality.

Enea furnishings are designed in collaboration with acclaimed studios and designers such as Manel Molina, Lievore Altherr Molina, Josep Lluscà and Gabriel Teixidó.

By working with designers who seek technologies that push the boundaries of design engineering, we benefit from their creativity and aestheticism, and realise it with technical knowhow that is second to none.

Los muebles Enea están diseñados en colaboración con estudios y diseñadores de prestigio como Estudi Manel Molina, Lievore Altherr Molina, Josep Lluscà y Gabriel Teixidó.

Nos gusta trabajar con diseñadores que investigan con la tecnología para expandir de este modo los límites del diseño industrial. Es nuestra forma de integrar creatividad y estética con unos profundos conocimientos técnicos.

The Basque Country boasts a robust tradition of developing industrial techniques and a fierce independence of design spirit. Its rugged, uncompromising landscapes inspire us to create bold, enduring furnishings.

El País Vasco presume de una sólida tradición en el desarrollo de técnicas industriales y de un espíritu de diseño audaz y personal. Sus paisajes accidentados e implacables nos inspiran para crear un mobiliario sólido y con carácter.

A photograph of a serene forest landscape. In the foreground, a calm lake reflects the surrounding green trees and the misty sky above. The middle ground is filled with a dense forest of coniferous trees, their dark green needles contrasting with the light-colored mist that hangs low over the canopy. The background consists of more forested hills, partially obscured by the thick mist.

Intelligent design
means sustainability
and strength.

Our range of chairs, tables and accent furniture cover a wide range of aesthetic and design functions. Each piece is designed with versatility in mind. We create design fundamentals, which then evolve as our collection grows, and adapt to our clients' needs.

Nuestra gama de sillas, mesas y muebles auxiliares abarca una amplia variedad de opciones estéticas y funcionales. Cada mueble está concebido pensando en su versatilidad. Creamos líneas de diseño que van evolucionando a medida que nuestra colección crece para adaptarse a las necesidades de nuestros clientes.

Product collection

A wide-angle photograph of a mountainous landscape. The foreground and middle ground are dominated by a steep slope covered in a dense forest of tall, dark green evergreen trees. The terrain is rugged, with exposed light-colored rock formations and ledges where smaller plants and shrubs grow. The lighting suggests a bright day, with sunlight filtering through the canopy and casting shadows on the rocky areas.

Our values represent
permanence and vigour.

Lottus

Chair, Stool, Bench, Kids

Lottus collection is versatile and organic, taking its cues from the nature. An ever-evolving piece, it can be sophisticated or playful, restrained or bold. Equally at home in public and intimate environments, it offers design confidence and flair in any context.

La colección Lottus, inspirada en la naturaleza, es versátil y orgánica. Unas piezas en constante evolución que pueden ser sofisticadas o alegres, reservadas o atrevidas. Su diseño ofrece confianza y estilo en cualquier ambiente, sea un espacio público o privado.

Born of design excellence, natural curvature sits comfortably between formality and comfort.

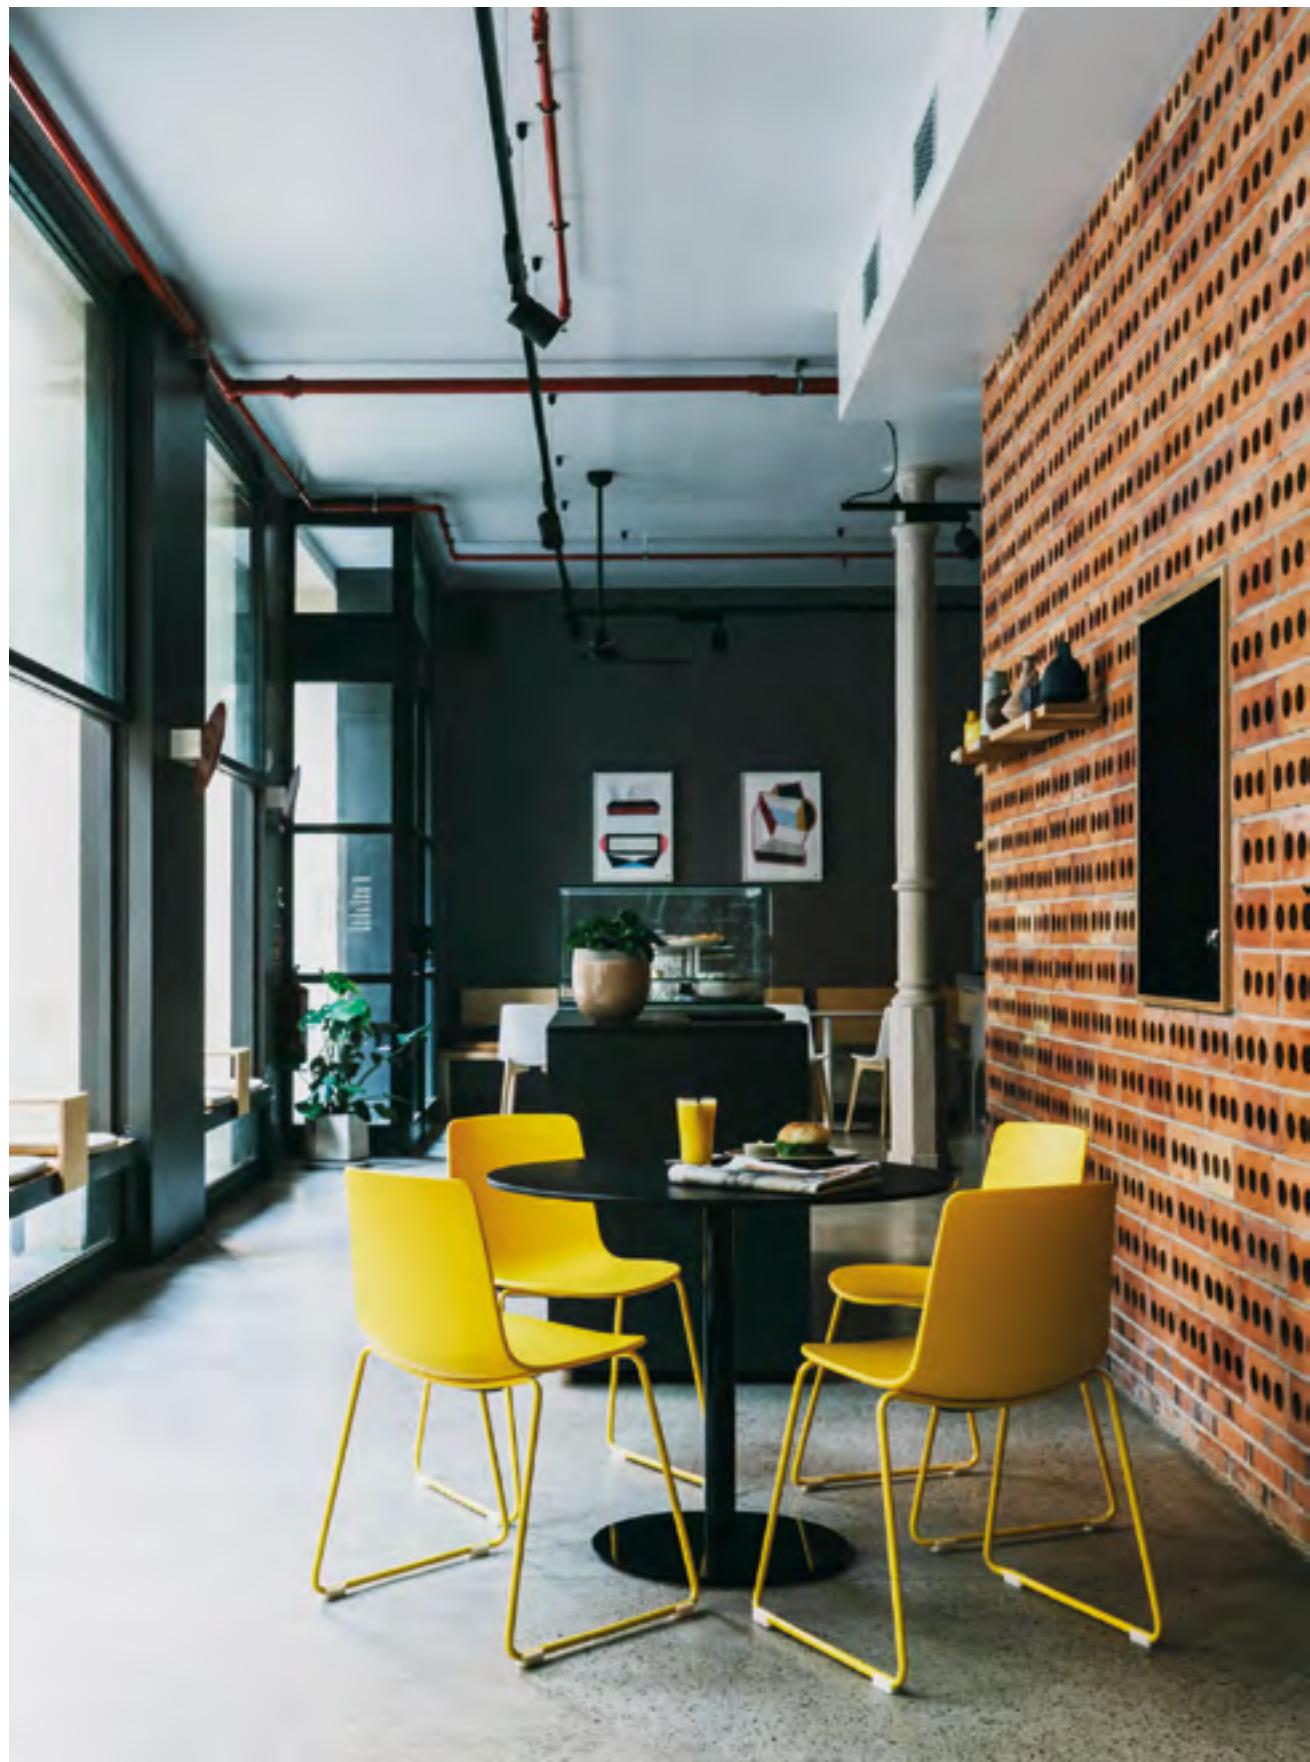

Su curvatura natural, producto de la excelencia de su diseño, se ubica cómodamente entre la formalidad y el confort.

Lottus Tables

Table

Lottus Tables are designed to be uninvasive and compliment the Lottus family of chairs. In varying heights and with different base and table top options, the crisp aesthetic of the range hides engineered durability and functionality.

Las mesas Lottus han sido diseñadas para ser discretas y complementar la familia de sillas Lottus. En diferentes alturas y distintas opciones de base y encimeras, la estética nítida de la colección responde a su resistencia y funcionalidad.

are simple and beautiful.**

LTS System

Table

The LTS System tables feature clean lines and minimal, contemporary design, but hide a technical prowess and in-built array of integrated accessories that make them the optimum choice for modern working environments. In varying heights and sizes, and with infinite configuration options, LTS system represents the ideal solution for any setting.

LTS System se caracteriza por unas líneas puras y un diseño minimalista y contemporáneo, pero su sencillez esconde la ingeniería con la que se ha concebido. Los accesorios, pensados para que se integren en el conjunto, la convierten en la solución óptima para entornos de trabajo modernos. Combinando distintas alturas y tamaños y con un sinfín de configuraciones posibles, LTS System es la opción ideal para cualquier espacio.

LTS System

158

In form as well as function, LTS System tables combine excellence in engineering with design.

En forma y en función, las mesas LTS combinan la mejor ingeniería con el diseño más cuidado.

- Tubo redondo de ø60x1,5mm de acero laminado en frío
- Disco de acero lacado como base
- Soldadura semiautomática en robot de arco con aporte de hilo de acero controlado con gas

A wide-angle photograph of a massive concrete dam. The dam is composed of several large, rectangular concrete blocks stacked vertically. The concrete is weathered and shows signs of age, with some discoloration and small orange stains. In the foreground, there is a body of water that reflects the light and the structure of the dam. The perspective of the photo is from a low angle, looking up at the dam, which emphasizes its size and strength.

Strength and power can be
creative and inspirational.

Tray

Study Chair

Tray chairs embrace a progressive, dynamic response to the requirements of rapidly changing learning environments, through simple but careful solutions for maximum adaptability.

Tray da una respuesta dinámica y rápida a las necesidades de cambio en ambientes educativos a través de soluciones simples pero cuidadosas para la máxima adaptabilidad.

Lightweight and mobile, Tray makes spaces instantly more adaptable.

Ligera y móvil, Tray se adapta al instante a todo tipo de espacios.

Tray (ref. 9609) monochrome in RAL 9016 and seat pad Divina Melange 220 with Lottus Lounge (ref. 5946).

Tray's smartly engineered tray and rack are seamlessly integrated to suit individual needs.

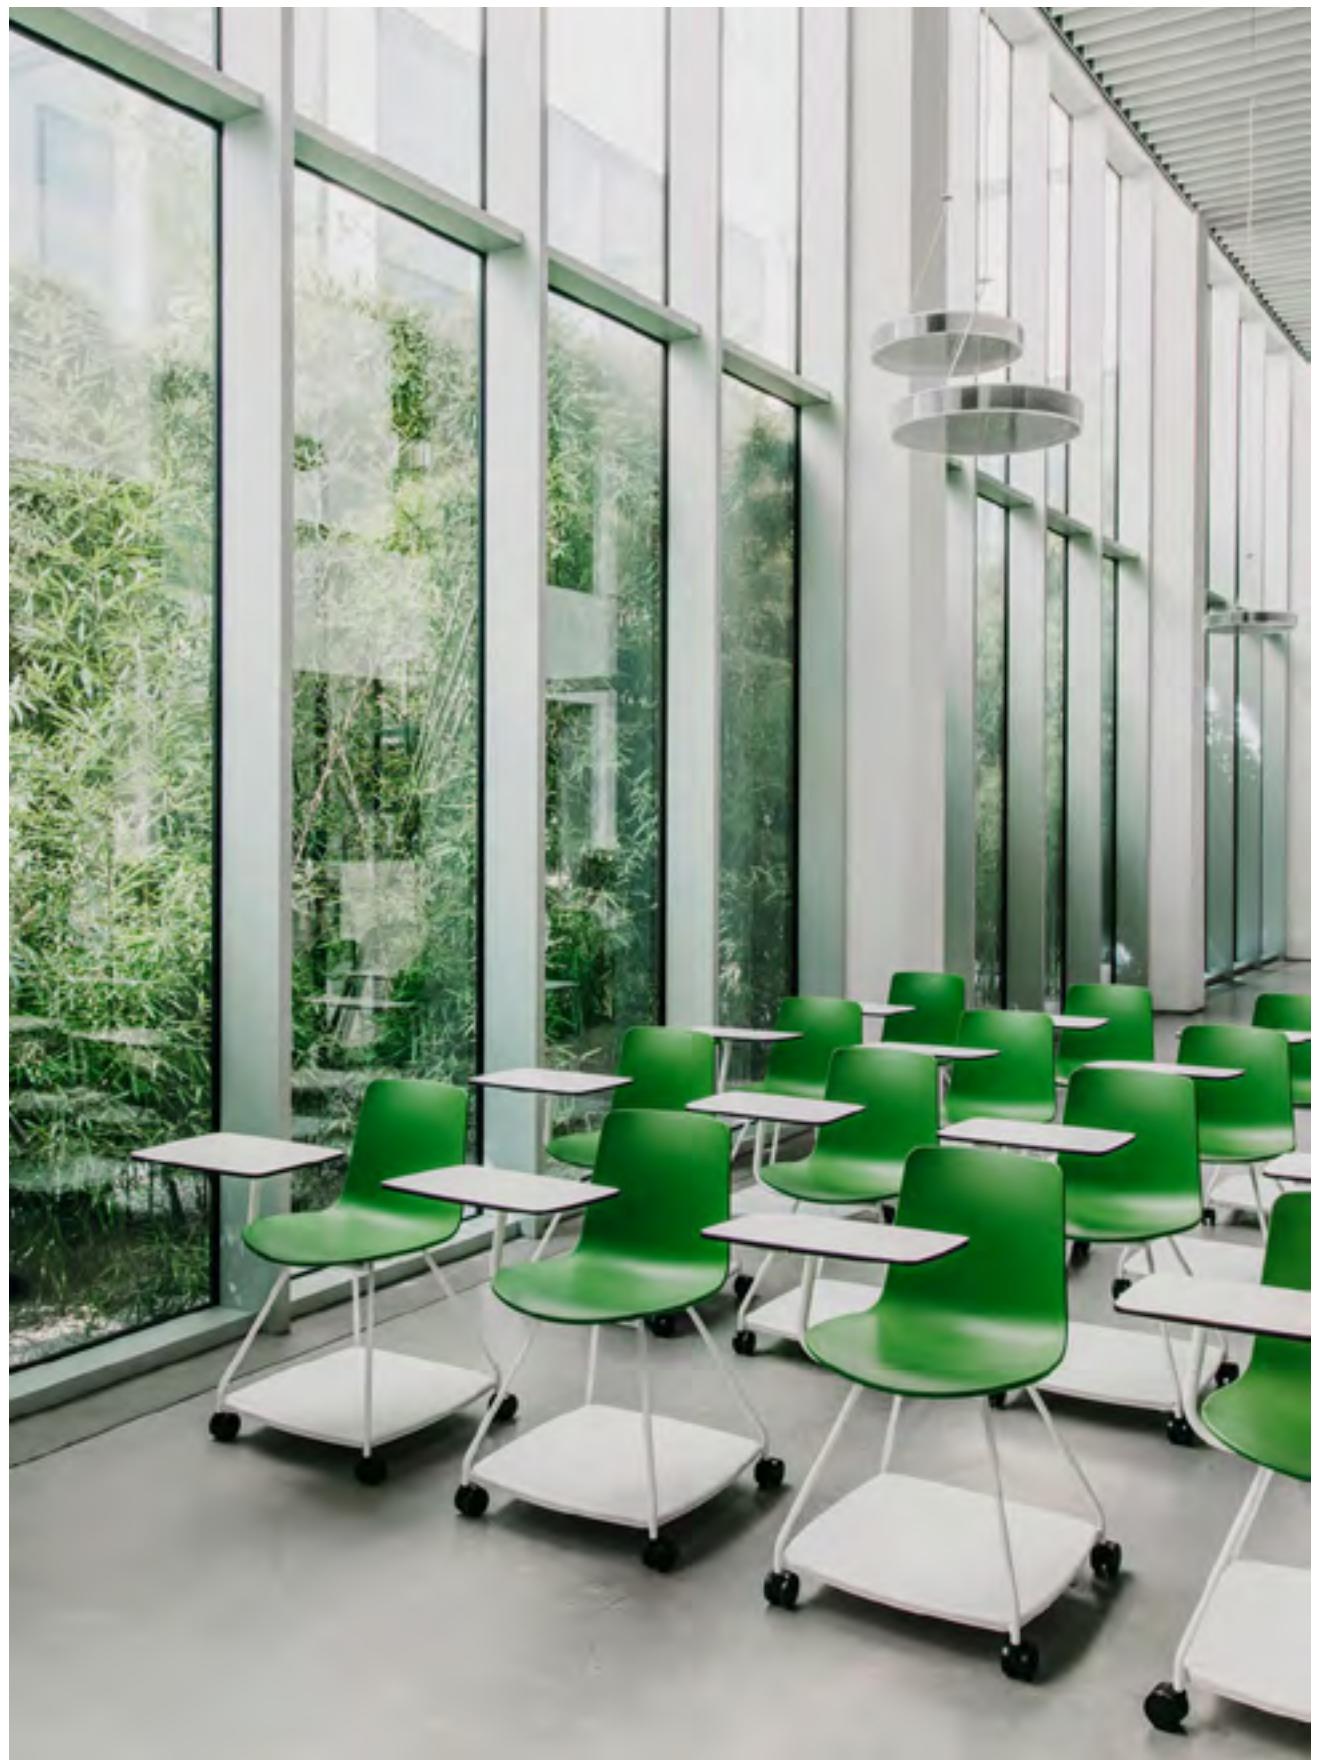

La bandeja y el estante están integrados a la perfección para adaptarse a las necesidades individuales.

Tray (ref. 9609) monochrome
in Pantone 5753 C and Pantone
4975 C.

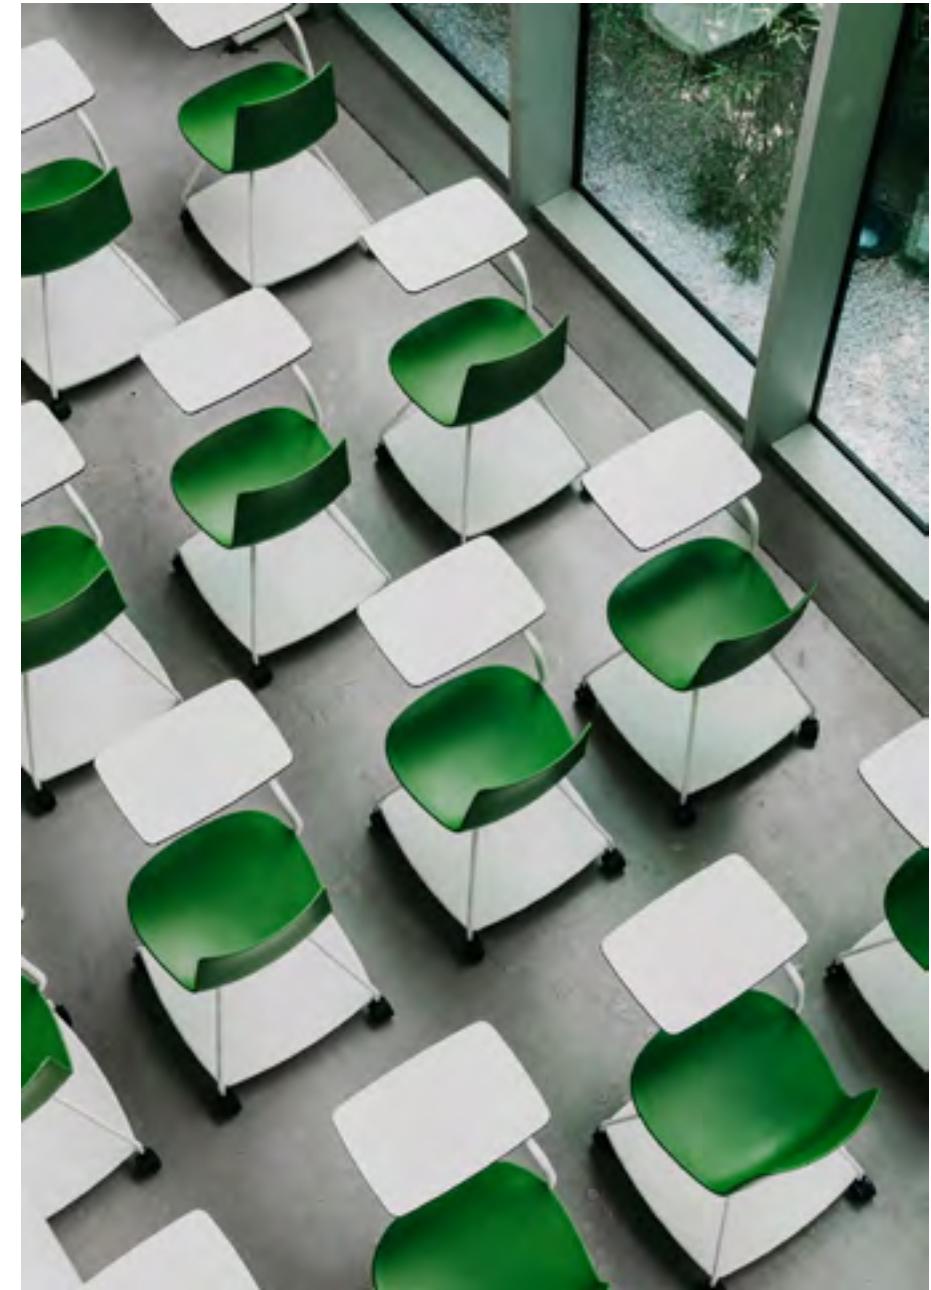

On the right: Tray (ref. 9609)

On the right Bio chair
(ref. 3800) in RAL 9005
monochrome, with black
writing tablet (ref. 3813)
and seat connector (ref.
3809).

Giving good user comfort in large communal areas, all versions of the Bio are stackable, and can be used with a writing table. They also have a linking device system to create joined rows of seating and can be adapted to beam seating. There are two different backrests available: the short backrests version, Bio, and a larger version, Bio-L.

Todas las versiones de Bio ofrecen un alto nivel de comodidad en grandes espacios comunes, son apilables y se les puede incorporar una tablilla de escritura. Asimismo cuentan con un sistema de conexión para formar filas de asientos. La familia incluye la versión bancada. Existen dos versiones de respaldo que la identifican y diferencian, una con respaldo corto, Bio, y otra con respaldo largo, Bio-L.

The certificate of Quality Management System in accordance with the UNE-EN ISO 9001 (Spain) is testament to the capacity of the organization to consistently provide products and services that meet customer and associated regulatory requirements. This International Standard promotes the adoption of an approach based on the PDCA (Plan-Do-Check-Act) continuous improvement cycle.

El certificado del Sistema de Gestión de la Calidad según la norma UNE-EN ISO 9001 demuestra que la organización tiene capacidad para proporcionar de forma coherente productos o servicios que satisfacen los requisitos del cliente y los reglamentarios aplicables. Esta norma internacional promueve la adopción de un enfoque basado en el ciclo de mejora continua PDCA (Planificar, Hacer, Comprobar, Actuar).

The implementation of the Environmental Management System in accordance with the UNE-EN ISO 14001 (Spain) offers organisations the possibility to systematize all environmental aspects for the entirety of their activities. It also promotes protection of the environment and pollution prevention by taking into consideration socially responsible management and the optimization of resource and waste in order to reduce the negative environmental impacts of their activities.

La implantación del Sistema de Gestión Ambiental de acuerdo a la norma UNE-EN ISO 14001 ofrece la posibilidad de sistematizar los aspectos ambientales en cada una de las actividades que se desarrollan en la organización. También promueve la protección ambiental y la prevención de la contaminación teniendo en cuenta la gestión socialmente responsable, así como la optimización de recursos y residuos para reducir los impactos ambientales negativos derivados de su actividad.

The AENOR Ecodesign certificate demonstrates that the organization has adopted a management system to identify, monitor and continuously improve the environmental aspects of its products and/or services by providing information to their customers about the products that have incorporated environmental improvements through their design, in accordance with the UNE-EN ISO 14006 (Spain).

El certificado de Ecodiseño de AENOR demuestra que la organización ha adoptado un sistema de gestión para identificar, controlar y mejorar de manera continua los aspectos ambientales de sus productos y/o servicios facilitando información a sus clientes sobre los productos que han incorporado mejoras ambientales a través del diseño, de acuerdo con la norma UNE-EN ISO 14006.

It's Enea, everywhere.

Enea is a local business with global reach. We are constantly working to develop international clients and export all over the world. The quality of our manufacturing, design and engineering and our relationships with agents and distributors on five continents allow us to develop sustainable relationships on a global scale.

Enea es una empresa local con alcance global. Trabajamos constantemente para llegar a clientes internacionales y exportar a todo el mundo. La calidad de nuestra fabricación, diseño e ingeniería, así como nuestros vínculos con agentes y distribuidores en los cinco continentes, nos permiten desarrollar relaciones sostenibles a escala mundial.
